BRITISH MEDICAL BULLETIN Volume 62 2002

Vaccination

Scientific Editors: Peter C L Beverley, Leszek Borysiewicz, Adrian V S Hill, Ian G Jones and J G Patrick Sissons

1 Overview of vaccines and immunisation
Myron M Levine, James D Campbell and Karen L Kotloff

15 Immunology of vaccination
P C L Beverley

29 Delivery technologies for human vaccines
Philippe Moingeon, Charles de Taisne and Jeffrey Almond

45 Bacterial pathogen genomics and vaccines
Richard Moxon and Rino Rappuoli

59 Malaria vaccines
Vasee Moorthy and Adrian V S Hill

73 Tuberculosis vaccines
Douglas B Young and Graham R Stewart

87 Design and tests of an HIV vaccine
Andrew McMichael, Matilu Mwau and Tomas Hanke

99 Development of vaccines against common colds
Wieslawa Olszewska, Maria Zambon and Peter J M Openshaw

113 Vaccines against human enteric bacterial pathogens
Gordon Dougan, Alan Huett and Simon Clare

125 Vaccines against persistent DNA virus infections
M R Wills, A J Carmichael and J G P Sissons

139 Vaccine development against schistosomiasis from concepts to clinical trials
André Capron, Monique Capron and Gilles Riveau

149 Cancer vaccines and immunotherapy
Said Dermime, Anne Armstrong, Robert E Hawkins and Peter L Stern

163 Vaccines against dangerous pathogens
E D Williamson and R W Titball

175 Life-style vaccines
Pascal Mettens and Philippe Monteyne

187 Mathematical models of vaccination
Almut Scherer and Angela McLean

201 Vaccine programmes and policies
D Salisbury, P C L Beverley and E Miller

213 Eradication and cessation of programmes
P D Minor
